To

1. Hon'ble PM of India
2. To whoever else it may concern,

Dear Respected Sir/Madam,

Namasthe. My sincere thanks to Central government for striving to develop India on par with developed nations. As you see, the world is polarized with many strong & large nations (including India) striving to be first and greatest. Every race & religion also feel they are most superior. Wars may be around the corner in few decades if not few years. And wars are fought by nations. Nations are nothing but their leaders (peoples) and their peoples. And population (peoples) of the world would only increase. I'm afraid if there is a next world war, the people who would suffer most again are those from Asia and Africa (especially colored people due to discriminatory ideologies like religion, sect, language, nation, tribe, race etc.) There are many solutions. However, the best and the final solution to this problem is "Space Travel".

Instead of competing with each other in "Space Races", if all nations pool together their resources and talent it may be possible for human beings to go to other planets and live there. This would relieve burden on Mother Earth! For this, I pray and wish

1. there are World Summits on Manned Space Missions similar to COP 21 on Climate Change!
2. there is a separate branch/department in UNO for Manned Space Missions (Similar to UN Security Council, with equivalent funding, though small in size).

To prevent next Great War and obliteration/annihilation of remaining species of Homo Sapiens, space travel must happen!

To save the animate (humans, flora, fauna) and the inanimate that constitute Mother Earth, space travel must happen! There is no alternative!

Since it is in my own personal interest if not anyone else's grievance that India works in coalition with all nations on Mother Earth for Mother India's own sake, I am submitting this humble grievance/request. (same message also in PDF attached)

What I wrote is from/related to my own research and experiences. Please kindly forgive me if I said or asked for anything inconvenient, incorrect & wrong. Due to time constraints, please kindly forgive my English mistakes too.

Satyameva Jayathe!

Kal Gandikota
